Now that you have installed the MetaTrader4 program and opened a demo account, please proceed to Step 3 to install the expert advisor.

Step 3: Install Expert Advisor Files “example.ex4” and “example.mq4”

Please note: each month the names of these files will change but the extensions “ex4” and “mq4” will remain.

First you need to close the MetaTrader4 application. The expert advisor directory is typically located under the “experts” subfolder of the MetaTrader4 installation folder. You can use Windows Explorer to browse to the directory. Use the follow figure for example. The MetaTrader4 install folder is “c:\program files\MetaTrader 4”. Therefore, the expert advisor folder is “c:\program files\MetaTrader 4\experts”.

Now copy the expert advisor files “example.ex4” and “example.mq4” into this the “experts” folder. Notice the files “example.ex4” and “example.mq4” is now under the “experts” subfolder of the MetaTrader4 installation folder:

After the EA is copied to the “experts” folder, we need to verify the EA is installed properly. Let’s start the MetaTrader4 application. In the Navigator window, open the “Expert Advisors” folder. If you see the EA listed under the folder as in the picture below, it means the EA is now installed. Congratulations! Now we are ready to use the EA.
